

Acus Consulting & Alberto Calva

“Support in long term decision making”

Acus Consulting. We support companies, organizations and government agencies in financial and strategic analysis, investment project evaluations, financial planning and decision making.

The expertise professional field is in corporate finance, economy and strategy. Within this field the projects are centered in numerical analysis, long term evaluations, profitability and economic value creation in the firm, business financial and strategic analysis, risk analysis.

Our differentiation is a business and entrepreneurial approach of the projects, positioning ourselves as if we were another investor and as part of the decision making team. We make financial models and we make financial analysis as a tool for the project, but the value added that is mainly appraised by the client is our participation with them in the decision making.

Consulting. Some typical projects are:

- Investment project evaluation
- Project finance, PPP, PF, PFI, PPS
- Business valuation
- Financial and strategic analysis of companies
- Profitability analysis
- Measurement of the economic value added
- Cost analysis
- Cash flow analysis
- Financial modeling
- Financial model auditing
- Financing decision analysis
- Financial planning
- Strategic planning
- Support in decision making

Executive education seminars.

Acus Consulting is a member of The Canadian Council for Public Private Partnerships (PPP or P3).

Alberto Calva is a business consultant and an entrepreneur. He founded Acus Consulting in 1989. His services are business consulting, executive education and conference lecturer. He has trained close to ten thousand executives and entrepreneurs from more than twenty different countries in the last twenty five years.

He has more than twenty years of experience in business as an executive, a board member and as an entrepreneur. Within these past 25 years, he had successfully managed his company through four macroeconomic crises. When starting his career, he was part of the executive team that avoided the bankruptcy of a manufacturing company.

He holds a Bachelor's degree in Industrial Engineering, a Master's degree in Economics, an MBA –with mayor in Finance- and is a PhD candidate. He has been a part time professor in two leading graduate business schools since 1989. He wrote and published a book (“What Every Manager Should Know About Finance”). He has written more than 400 articles on finance and business.
